TAILORED SCIENCE EDUCATION FOR YOUNG GIRLS

EXCEL IN WASSCE THROUGH OUR EXCITING CURRICULUM

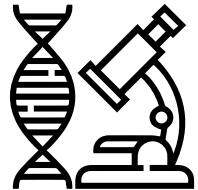

At Nyapui Senior Secondary School of Excellence, we provide our students with an exciting blend of academics and physical activity to stimulate the minds' ability to seek more knowledge. Our curriculum highlights the extreme importance of practical education to not only prove what is theoretical but to allow our LEADERS OF TOMORROW to disprove what is theoretical.

Teachers of Nyapui Senior Secondary School

WE BELIEVE IN SCIENCE

At our core, is our love and belief that Science charts a path for a BETTER TOMORROW in Sierra Leone. A TOMORROW that will be led by students from NYAPUI SCHOOL. As a science school, our curriculum is tailored with emphasis on all sciences to nurture a desire and pursuit of all sciences in tertiary institutions. With consultations with the Ministry of Basic Secondary School Education (MBSSE) our teaching staff have decades of expertise in all science courses as well as French ensuring that our Leaders of Tomorrow are fluent in global languages. This commitment to high quality science education sets us apart from other schools in the country.

A SOLID FOUNDATION

We provide the Leaders of Tomorrow, a solid foundation that promotes social, emotional, physical and cognitive skills that are invaluable to a Tomorrow in Sierra Leone that is modern, industrialized and driven by technology. We equip our children with the science education, attitude, learning and values to ensure they become the FULL POTENTIAL LEADERS of Sierra Leone fostering love, health and the ability to apply the knowledge they've acquired to make Sierra Leone and our planet, a better place.

-  **Elective Mathematics (choice)**
-  **Biology (compulsory)**
-  **Chemistry (compulsory)**
-  **Physics (compulsory)**
-  **Information Technology**
-  **Geography**
- Additional Subjects**

AN ENABLING ENVIRONMENT FOR ACADEMIC EXCELLENCE

Science Labs

Our dedicated science and technology laboratories provide the best environment for our Leaders of Tomorrow to explore, probe and experiment to unravel the truths behind the facts of life and generate new facts as well. To cater to the needs of enthusiastic scientists. The Nyapui School possesses well-designed, spacious and well-equipped Physics, Chemistry, Biology and Technology Laboratories. They have all sets of accurate digital measuring instruments, kits, experimental gadgets, models, charts and other necessary apparatus enabling knowledge acquisition. Each laboratory has a seating capacity of 25 students.

Learning Block

The learning block is built to provide students easy access to their classrooms, library and to their teachers. The block is made up of seven classrooms, each with a seating capacity of 30 students. Additionally, students have direct access to a 50-seater capacity library well-furnished with elaborative educational resources on diverse topics of interests. This further equips our Leaders of Tomorrow with important information, ideas and knowledge to equip them with learning skills, triggers creative thinking and enables them to adapt to self-learning methods.

BOARDING CAMPUS

The 300-bed boarding facility located on the Nyapui School Campus provides our Leaders of Tomorrow the platform to further build their personal, social and academic relationships with peers ensuring the learning exchange does not end affect classroom hours. We create a feeling of home life by ensuring that students can share important parts of their own culture in the Boarding house. Boarders are exposed to a rich and balanced portfolio of experiences as we are committed to nurturing meaningful values and good behaviour. Respect and Consideration of others is the cornerstone of our philosophy. Under the motherly care of our House Mistresses (matrons), our girls are safe all the time.

RECREATIONAL PROGRAMS

Our commitment to the advancement of our Leaders of Tomorrow goes beyond the academic field that is why we ensure we curate recreational activities that challenge the physicality, social, tactical and emotional intelligence of students. These programs include bands, debating teams, athletics and intramural activities, hobby groups and interest clubs that focus on climate change, computer and engineering courses. We also provide more traditional recreational activities including a wide array of indoor and outdoor sporting activities.

CREATING OPPORTUNITIES FOR YOUNG GIRLS IN SIERRA LEONE

The Nyapui Senior Secondary School of Excellence located in Kenema is a model science school is improving the access to a quality science education by young girls in Sierra Leone. The school is an action point for the construction of similar schools across Sierra Leone. The school was constructed by SEND Sierra Leone with financial support from the German Federal Ministry of Economic Cooperation and Development (BMZ) through Terra Tech Förderprojekte e.V under the Kenema Education Project implemented between 2020-2022. In collaboration with the Government of Sierra Leone through the Ministry of Basic Secondary School Education (MBSSE), Kenema District authorities and other stakeholders, the school is managed by the Nyapui School Board with a Headmistress and her team of qualified teaching staff.
